EDUCATION

KL Deemed to be University

B.Tech, Computer Science & Engineering — PBL (Project Based Learning), Trimester Mode

Expected Graduation: 2029

CGPA: 9.12 / 10.0

L.N. College, Shahpur, Amarpur, Banka (BSEB)

Intermediate (Class XII) — PCMB

2025 | Percentage: 65.4%

St. Joseph's School, Jagatpur (ICSE)

Indian Certificate of Secondary Education (Class X)

2023 | Percentage: 73.2%

PROJECTS

SkillTrack Maharashtra – Skilling Outcomes & Impact Intelligence Platform | [GitHub](#) | [Live](#)

SIH 2026 | Aug 2026

Next.js, TypeScript, MongoDB, Supabase, Vercel — Smart India Hackathon 2026 • Problem ID 26135

- Built a full-stack intelligence platform for the Government of Maharashtra to track the longitudinal journey of skill-development trainees from enrollment through employment and career progression.
- Implemented a Government Analytics Dashboard with ML-inspired Skill Gap Analysis, Live MongoDB aggregations for employment trend metrics, and a Salary Progression Engine computing 24-month income growth.
- Developed a Trainee Self-Service Portal with immutable employment history logging, Certifications Wallet, and proactive follow-up reporting — replacing fragmented Excel workflows with a unified data-driven system.

COVID-19 Data Analysis Dashboard | [GitHub](#) | [Live](#)

Data Science Project

Python, FastAPI, HTML, CSS, JavaScript, Docker — Deployed on Hugging Face Spaces

- Built a full-stack interactive dashboard to explore real-time COVID-19 statistics and forecasts; containerised with Docker and deployed on Hugging Face Spaces.
- Implemented a 5-stage data science pipeline: Data Cleaning & Preprocessing → Exploratory Data Analysis → Probability Analysis → Statistical Inference → Regression Analysis (ML Predictions).
- Generated professional documentation artifacts (17-section PDF report and PowerPoint slides) alongside the live dashboard, demonstrating end-to-end analytical workflow.

College Placement Prediction AI | [GitHub](#)

ML Web App | v1.0

Python, Flask, scikit-learn, HTML, CSS, Docker — Production-Ready ML Pipeline with SaaS-Like Dashboard

- Built a dual-model ML pipeline using Random Forest Classifier (Placed / Not Placed) and Random Forest Regressor (salary estimation in LPA), inferring across 10 features including CGPA, Coding Test, Mock Interview, Aptitude, Soft Skills, and Extracurriculars.
- Designed a premium dark-mode glassmorphism dashboard with real-time system health widgets (API latency, memory usage), a live inference feed, and a macOS-style Terminal Report Viewer for EDA output.
- Implemented a Batch Processing Engine to run CSV uploads of hundreds of student profiles simultaneously; integrated automated EDA generating high-resolution Univariate & Multivariate visualizations and downloadable `.joblib` model files.

HealthNet – Intelligent Hospital Resource Management

Java, OOP, Data Structures

- Designed a resource management system for patient registration and scheduling; optimized lookups using Java Collections (HashMap, Queue, Stack).

CatalogX – API-Driven Product Catalog & E-Commerce Platform | [GitHub](#)

DBMS Academic Project

Java, FastAPI, Node.js, PostgreSQL, JavaScript, HTML, CSS, Python — Full-Stack Microservices Architecture

- Engineered a scalable, API-driven e-commerce platform with a microservices architecture spanning separate api-gateway, backend, node-backend, frontend, and database service layers.
- Implemented comprehensive DBMS concepts including complex relational schemas, full CRUD APIs via FastAPI + PostgreSQL, and an analytics dashboard surfacing product and sales intelligence.
- Integrated advanced features including API Gateway routing, multi-backend orchestration (Java + Node.js + Python), and AI-assisted product recommendations demonstrating industry-grade system design.

HospNav AI Architecture – Intelligent Hospital Navigation & Management | [GitHub](#) | [Live](#)

AI Course Project

Python, Flask, HTML, CSS, JavaScript, Render — AI Search Algorithms, Expert Systems

- Built a multi-floor hospital navigation web app powered by AI search algorithms (BFS, DFS, A*, UCS, Greedy Best-First) with empirical profiling of runtime, peak memory, and nodes expanded per algorithm.
- Implemented a Rule-Based Expert System (Triage) using forward-chaining IF-THEN rules and set intersections to automatically diagnose patient symptoms and route them to the correct department.
- Leveraged Python `heapq` priority queues and `collections.deque` for $O(\log n)$ pathfinding; used typed `dataclasses` to model graph nodes, edges, and state representations cleanly.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Tools: Next.js, Spring Boot, FastAPI, React, Flask, Vite | Git/GitHub, Docker, Postman, VS Code, IntelliJ IDEA, Render, Vercel, Hugging Face Spaces

Databases: PostgreSQL, MongoDB, MySQL

ACHIEVEMENTS & EXTRACURRICULARS

4★ CodeChef Programmer

Ongoing

- Highest rating **2128** — ranked **#3556 globally, #3112 in India** (Division 2).

DSA Rating 1901 — CodeChef

Ongoing

- Highest rating **1904** — **#445 globally, #422 in India**; 640+ problems solved.

CERTIFICATIONS

- **TATA (Forage)** — GenAI Powered Data Analytics Job Simulation (Sept 2026)
- **Unstop** — HackQuest: Code for Communities 2.0 (Participation)
- **MIT & Unstop** — Navachar - Code Fest 2026 (Participation)
- **SCRUMstudy** — Scrum Fundamentals Certified
- **HackerRank** — Problem Solving (Intermediate) Certificate

- LeetCode Problem Solver

Ongoing

- Contest Rating **1540** — ranked **Top 41L globally**; 27 problems solved.

Adobe University Hackathon

Aug 2026

- Cleared Round 1 Online Assessment (MCQ + Coding).

RPA Club Member — KL University

2025 – Present

- Exploring automation, AI-driven workflows, and intelligent productivity tools.
- Adobe** — University Hackathon Round 1 Qualifier (Aug 2026)
 - CodeChef** — Java Programming; Algorithmic Problem Solving Using Java
 - freeCodeCamp** — Frontend Development Libraries; Legacy Responsive Web Design
 - Simplilearn** — Python Django 101; Introduction to ASP.NET; Mathematics for Data Science
 - Cambridge** — Linguaskill Certification
